

Mobile COVID-19 Testing Lab

RAPID DRIVE-THRU AND WALK-UP TESTING UNITS

The TPT MedTech QuikLAB™ is designed and manufactured to provide on-site COVID-19 testing services to hospitals, businesses and communities where rapid incremental infrastructure is needed, including during emergency situations like pandemics and other natural disasters.

Now you can get all the tests you need done out-of-building, 24/7, eliminating the logistic challenges of conventional off site testing, saving you both time and money!

TPT MedTech is recognized for its strong engineering expertise, advanced medical systems and innovative solutions. The QuikLAB™ is made in the USA and offers a high-quality, cost-efficient and climate controlled turnkey testing lab. Our engineering teams will work with you to build your QuikLAB™ to your specific requirements.
